## FIRST AID

### ACCIDENTS CAUSED DUE TO ACIDS

#### BODYBURNS

Wash with plenty of water first and then with Sodium bicarbonate solution. After wash, apply a paste of Sodium bicarbonate - Petroleum jelly mixture on the burnt part for 10-15 minutes. Again wash with plenty of water and apply Carron oil (Anequal quantity of Lime water and Linseed oil).

#### SPILLAGE IN THE EYES

Wash with plenty of water first and then with 2% Sodium bicarbonate solution followed by water again. Wipe out the water from your eyes and then put 2-3 drops of Olive oil.

#### SPILLAGE ON CLOTHES

Use dilute Ammonia solution to neutralise the acid. Then wash with plenty of water.

#### ORAL INTAKE

Gargle with water first and then drink atleast 1 litre of milk or water followed by lime juice.

### ACCIDENTS CAUSED DUE TO ALKALI

#### BODYBURNS

Wash with plenty of water first and then with Boric acid solution. Make a paste of Boric acid, apply on the burnt part and after 10-15 minutes wash it off.

#### SPILLAGE IN THE EYES

Keep open the eyelids and wash with plenty of water first and then with dilute Boric acid solution (0.5%). Again clean your eyes with water. Wipe out the water and then put 2-3 drops of Olive oil.

#### SPILLAGE ON CLOTHES

Neutralize the alkali with dilute Acetic acid solution (3%). Then wash with plenty of water.

#### ORAL INTAKE

Gargle with water first and then drink at least 1 litre of milk or water. Eat oranges.

### BURNS CAUSED BY BROMINE

Wash the burnt part with either Alcohol or Petrol and then apply Olive oil.

### BURNS CAUSED DUE TO FIRE

Apply either Petroleum jelly or Burnol on the burnt part.

### WOUNDS

First remove any foreign particle (like glass pieces etc.) from the wound. Clean well with water and apply Tincture iodine, put a bandage and seek medical attention.

### GENERAL ADVICE

- For severe burns caused due to acid keep the burnt part in Sodium bicarbonate-Petroleum jelly mixture and for those burns caused due to alkali, keep in the Boric acid solution for at least half an hour.
- While packing compounds of Cobalt, Chromium, Cadmium, Bismuth, Barium, Lead, Tin etc., it is necessary to wear the respective safety equipments /guards (like gloves, goggles, face mask etc.). In case these chemicals are accidentally consumed, try to spit it out even by vomiting.
- While packing Formaldehyde or Hydrogen peroxide, if it falls on the body or clothes, wash with plenty of water.
- If Copper Sulphate is consumed accidentally, drink a cup of warm water containing as spoon of Sodium chloride or Zinc sulphate.
- It is the duty of every one to ensure that chemicals do not come into contact with the body through their mouth, eyes, ears & nose. Also ensure that the necessary safety equipments are used.
- After providing first aid, seek medical attention, if necessary.

### FIRE

- Do not use water to extinguish an electric fire as it could give you a shock. Use dry powder fire extinguishers.
- If solvents lighter than water (like Xylene, Benzene, Acetone, I.P.A., Methanol, Petroleum ether, Diethyl ether etc.) catch fire, use wet blanket to cover the fire or use a suitable fire extinguisher. Splashing water on such fires could spread the flame. Be familiar with the usage of various types of fire extinguishers.

## HAZARD SYMBOLS

### FLAMMABLE

**Hazard:** 1. Spontaneously flammable substances.  
2. Highly flammable gases  
3. Substances sensitive to moisture  
4. Flammable liquids (with flash Points below 21°C)

**Caution:** Store in cool places. Keep away from open flame, source of heat and sparks.

### EXPLOSIVE
